

18th Therapeutic ERCP/EUS Workshop

Save the Date!
Friday, May 8th, 2015

Smilow Cancer Hospital at Yale–New Haven
55 Park Street Auditorium
New Haven, CT

Between five and ten different diagnostic and therapeutic ERCP and EUS cases will be selected for demonstration. Attempts will be made to obtain representative cases from these categories: difficult bile duct stones and strictures, minor papilla stenting, sphincter of Oddi manometry, and altered anatomy (Billroth II gastrectomy and Roux-Y choledochojejunostomy), pancreatic masses and cystic lesions.

The Yale Interventional Endoscopy Team will perform the procedures with the audience viewing real time images. Guest speakers will assist with the procedures as well as provide commentary and interact actively with the course participants. There will be ample opportunity for questions and discussions during and in between procedures.

COURSE DIRECTORS:

Harry Aslanian MD
